

INSTRUCTION

Use of Community Resources

The education of students is enhanced by well-planned and related experiences outside of the classroom. Teachers, counselors, and administrators are expected to make use of the best resources available within the community to improve and/or enrich the learning experiences of each student. These experiences may include, but are not limited to:

- A. Use of resource persons in the community.
- B. Use of community resources.
- C. Use of volunteers.

It is the responsibility of the district administrative team to develop rules and regulations to facilitate an effective use of community resources.
